~~SECRET~~/NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	: 8702
Date of Session	: 20Jan87
Date of Report	: 20Jan87
Session Number	: CRV-01
Source Identifier	: RV-003

1. (S/NF/SK) Tasking: Tasking provided to monitor this date (see attached data sheet). No other information provided.

2. (S/NF/SK) Session: Source seemed to acquire site immediately; S3 information looked good. After a general description of the area, to include a group of structures, monitor informed source that the target was one of the structures. After a session break, monitor provided the additional cue of "Building C", whereupon an immediate source response was elicited.

3. (S/NF/SK) Summary: Source described a site near a large body of water. At the site are structures. One structure is tall, rectangular, flat-topped, very massive and solid; of masonry and concrete construction. It is surrounded by vegetation and security fencing. Immediately within the structure is a very large, high-ceilinged entrance room with stairs leading up and out. Access to this structure is restricted to a relatively small number of people. This is primarily to protect knowledge of activities within from both hostile and domestic awareness. People inside are involved with considering and deciding upon numerous topics having to do with policies and procedures the effects of which may be far-reaching (not only with regard to hostile parties but also domestically, in which case might result objection or even upheaval).

4. (S/NF/SK) Feedback: In response to source's end-of-session inquiry, he was informed that this was the first time he had worked this operational target and that he would, most assuredly, work it again.

It's important that these people are pragmatic, not spiritual
particularity, but they think that must be done
according to what they perceive as the good
of the most involved ~~area~~ for whom they are
responsible.

Site ~~has~~ ^{is} ~~large, of heavy~~ ^{solid} body of water, large high landmass (at least one) and structures. One structure is tall, rectangular, flat-topped, very massive & solid, made of concrete & masonry; surrounded by green vegetated area & security fencing, through which there is a gate to a door. Inside structure is ~~first~~ ^{first} & ^{very} large high-ceilinged entrance room with 3 stairs going up out of it. Access to structure is restricted to a relatively small number of people. Access is restricted ~~because~~ primarily to protect ~~the~~ ^{knowledge} of going in ~~and~~ from hostile knowledge & ^{conceal} knowledge as well.

People inside committee, discuss, delegate assign, discuss, & decide on numerous topics which have to do with policies & procedures which sometimes produce far reaching effects; ie policies, etc. were known either to hostile parties or domestically misinterpreted about major complaints, objectives, a more operational effect on far-reach, negative, positive, neutral political, economic, military & social; those directly subject to effects have little recourse ~~to~~ ^{to} go along with policies. Effects are both material & non-material. International component is involved.
